Tecsys Inc

RE: DevOps Engineer Co-Op/Intern

Dear Hiring Manager,

I am writing to express my strong interest in the DevOps Engineer Co-Op/Intern position at Tecsys for the Winter 2024 term. With a background in DevOps, cloud technologies, and a passion for automating processes, I am eager to contribute to Tecsys's innovative team.

In my previous role as a Site Reliability Engineer at RETISIO Inc, I gained valuable experience in ensuring the smooth operation of production applications, including mobile, web, and desktop applications. I was responsible for deploying software updates, performing system health checks, and resolving production issues promptly to maintain business continuity. I have a proven track record of collaborating with in-house and third-party support teams to address defects and proactively escalate issues when necessary, contributing to a high level of application reliability.

My freelance experience as a Web Developer at FITNESS MATRIX Inc allowed me to develop strong backend web development skills using Node.js. I specialized in designing and optimizing databases for performance and security, implementing RESTful APIs, and enhancing application functionality. This experience has equipped me with the ability to create efficient, secure, and user-friendly software solutions.

My ability to transform requirements into effective solutions, coupled with my enthusiasm for optimizing efficiency, makes me a strong candidate for this role. I am excited about the opportunity to apply my skills and learn from the dynamic team at Tecsys.

Thank you for considering my application. I look forward to the possibility of contributing to Tecsys's success as a DevOps Engineer Co-Op/Intern. Please find my resume attached for your reference.

Sincerely,

Mubbaseer Makrod
